

Get brows that wow

Brow Kits

before

after

One kit does it all. Everything you need to create perfect arches that define and highlight eyes and frame the entire face is right here — all in a handy compact. Our compact has a magnified mirror and a see-through window so you can identify your colors instantly.

- Two shades of powder to fill and add definition
- Tinted wax to shape and hold brow hairs together
- Precision applicator
- A mirror for stay-put brows on the go

#14363 Black \$18

#14362 Brown \$18

#14361 Blonde \$18

It's as easy as 1-2-3

1. Using one end of the applicator, blend powder for a custom look or use each shade alone.
2. Swipe applicator across the appropriate shades and apply to brow hair with short, feathery strokes. Don't draw a line across your brows. This will make color look unnatural. Instead, blend with applicator.
3. With the applicator's other end, apply the wax to hold brows in place and tame stray hairs. A soft tinted shine adds richness to the color.

View colors instantly with the new see-through window on the lid.
