

# Sexy Summer Legs

Just in time to prepare your legs for the upcoming bare leg season!  
Give your legs a radiant, golden, sun-kissed glow  
with these fabulous products:

**Leg Apeel™ Leg Peel** 4.4 oz./125 g

**Leg Apeel Leg Scrub** 5 oz. /150 g

**Leg Apeel Self Tanner for Legs** 4.4 oz. /125 g

## The science behind Leg Apeel Products:

All three Leg Apeel products are dermatologist, sensitivity and allergy tested. They work together to create beautiful, tanned legs without the sun!

### Leg Apeel Leg Peel

**How it works:** As you sleep, Leg Peel works to loosen dry, dead skin cells, especially on the knees and ankles.

**Why you'll love it:** Once the damaged skin cells are loosened, your skin is better prepared for exfoliation with Leg Scrub and your skin can absorb the Self Tanner more evenly.

**How to use:** Cover your legs with the Leg Peel prior to bedtime and allow it to dry. In the morning, follow with Leg Scrub to exfoliate, then apply the Self Tanner for Legs.

### Leg Apeel Leg Scrub

**How it works:** This scrub is sugar-based with sea sand that exfoliates and moisturizes the skin to prepare it for the Self Tanner for Legs.

**Why you'll love it:** It reveals newer skin and leaves your legs feeling moisturized. Now you're ready for the Self Tanner for Legs!

**How to use:** After applying Leg Peel at night, apply Leg Scrub to legs during your morning shower to exfoliate dead skin. Gently massage into skin – paying special attention to your knees and ankles. Then rinse off and shave legs.

### Leg Apeel Self Tanner for Legs

**How it works:** It promotes an even, natural-looking tan.

**Why you'll love it:** It gives your legs natural radiant, even color with no streaks, no mistakes!

**How to use:** After preparing the legs with Leg Peel and Leg Scrub, apply the Self Tanner for Legs. Start at your ankles and work your way up, massaging into skin in circular motions. Apply sparingly to your knees and ankles. As with any self-tanner, wash hands immediately after use to avoid staining. Avoid contact with clothing until product is dry. For deeper color, wait at least 24 hours before applying again.

#### How it's different from other products.

This self tanner contains advanced ingredients for a deeper, richer tan without that "orange" look. We've tinted the tanner to help you determine where you've applied the product. The color of the product does not add color or stain your skin.
